### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frederick Cooperrider on 5/11/2006.

2. The application has been amended as follows:

Amend claim 15 by deleting the second occurrence of the phrase: "wherein said value comprises a value entered by a user using an input device."

Claim 15 should read: 15. A projector comprising:

A storage device that stores a predetermined approximate expression for correcting a projected image for distortion;

A calculator that performs a geometrical transformation for said projected image emitted from said projector, in accordance with said predetermined approximate expression; and

A receiver to receive a value for substitution as one of a parameter and a variable into said predetermined approximate expression, wherein said value comprises a value entered by a user using an input device.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

3. Claims 15-20 are allowed.

4. The following is an examiner's statement of reasons for allowance: Applicant has amended claim 15 to be an independent claim. Since it was previously indicated to be allowable if re-written in independent form and applicant has complied, claims 15-20 are allowable. Specifically claim 15 claims that a user inputs a value for substitution as one of a parameter and a variable in a predetermined approximate expression for correcting projected image distortion. This was not found in the prior art, although having a user assist a projector for correcting for keystone distortion is known; this generally comprises of the user physically moving the projector or adjusting a control that is not related to a predetermined approximate expression (simply changing the projection shape does not necessarily require anything as complicated as a predetermined approximate expression that receives a value.) Accordingly claims 15-20 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
